Objectives:

The group focuses mainly on the mutations undergone by Moroccan rural space and its management. The aim of research, mainly multidisciplinary, comes within the framework of a global thematic of assessment and analysis of the dynamics and interventions that operate at varied levels within the Moroccan rural space.

Center of interest of the group

The GREMR focuses more specifically on themes that are linked with the Moroccan rural world, in its largest meaning:

➤ **principal axe:**

🌍 Dynamics of the rural space, socio-spatial mutations and regional management.

➤ **Sub-axes**

🌍 Management and development of the fragile agricultural and rural spaces,

🌍 Countryside-city relationship and problematic issue of management of the suburbs (Region of Rabat Salé Zemmour-Zaër and region of Chaouia Ouardigha as examples),

🌍 The rural and emergent centers,

🌍 Internal and external migrations,

🌍 Protection and development of resources (sustainable local development),

🌍 The development of local participation-actors,

🌍 The small peasantry facing globalization,

🌍 Tourism and cultural heritage in rural milieu,

🌍 Development of methods and techniques of research in the rural milieu (GIS, remote sensing...).
